Auditors' Report.

We, the undersigned, Auditors of the Town of Epping, have examined the accounts of the Selectmen, Town Treasurer, Town Clerk, Treasurer of School District, Treasurer of Public Library and Police Justice, and find them correctly cast and properly vouched. We have also examined the books and accounts of the Tax Collector for the year 1910, and find them correctly cast, and that he has squared his books and paid over to the Town Treasurer all money in his hands.

Report of Board of Health.

The Town as a whole, from a sanitary standpoint, has been in a very healthy condition during the past year, with only a few cases of measles and scarlet fever, and some typhoid.

The brook running by the rear of E. A. Prescott's shop, across Main street to the river, which has always been used as a public sewer, needs attention by the proper authorities. On account of the rocks that have fallen in, and the various kinds of rubbish that have been dumped into it, it now contains a vast amount of filth, and unless removed, may some day be the cause of some serious epidemic through the vicinity which it flows.

We recommend that the Town cause it to be annually cleaned, or a tile sewer constructed.

The Board sent to the Laboratory of Hygiene at Concord water taken from the Lamprey river for analysis. The report in part says:

"While this analysis gives no special suggestion of the existence of any sewage contamination, still our records show that this water has contained colon (sewage) bacteria in the past, and before giving the supply our approval as a source of drinking water, an inspection of the water-shed would be desirable. A single analysis of a stream cannot be relied upon as an index of purity."

We also sent samples of cream and milk and they tested as follows:

<i>No.</i>	<i>Dealer.</i>	<i>Solids.</i>	<i>Fat.</i>
5432	W. F. Littlefield	12.25	3.50
5433	George H. Swain	13.30	4.60
5434	W. S. Mason (cream)		20.08

"None of the above showed the presence of any preservatives and all are above standard."

OUR EDUCATIONAL SYSTEM.

Your committee have made a faithful study of our educational system to ascertain the reasons for the difficulties in meeting the State requirements.

In order that our High school may be approved the State demands a certain training of our scholars, not only in the High school, but also in the grades leading up to the High school. You cannot have a very good superstructure on a weak foundation. Our High school depends, in a very great degree, on the thoroughness of the grades, but thorough work cannot be done if the amount to be accomplished has become so great as to become altogether too onerous. After due examination we find at least two weak links in our educational chain—one in the Intermediate school, the other in the Grammar. We refer to the three grades in each case, a cumbrous, educational load heaped upon one teacher. This condition of affairs necessitates a minimum time for recitations and practically no individual work by the teacher in the educational interest of those scholars particularly, who are less fortunate mentally. Our schools never can be what the State demands, provided she approves them, until these obstacles are eradicated. Cut the three grades in the Intermediate to two, and do likewise in the Grammar school, and you will have done a most excellent thing in the educational interest of our young people. Such a plan, if executed, will mean another school room and another teacher, and would give each teacher below the High school just two grades to teach. This would make a tremendous difference in the intellectual advancement of our pupils.

We who have made this matter a study cannot speak too emphatically in favor of its approval by those whose servants we are.

Respectfully submitted,

WILLIAM S. MASON,
JAMES F. BROWN,
WALTER P. SANBORN,
